

Requirement Analysis

Customer Journey Map

Date	30 June 2026
Team ID	
Project Name	Cosmetic Insights: A Tableau-Based Analysis of Skincare Trends and Consumer Preferences

Scenario

Browsing, comparing, and selecting a cosmetic product suited to skin type and budget (Buyer journey), or benchmarking brand performance (Analyst journey).

CUSTOMER JOURNEY MAP – COSMETIC INSIGHTS PROJECT

Project: Cosmetic Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau

Persona: Priya Sharma – 24 Years, Software Engineer, Skincare & Beauty Enthusiast Goal: Find the right cosmetic products that suit her skin type, fit her budget and are from trusted brands.

STAGES	1. AWARENESS I have a need	2. DISCOVERY Explore Options	3. COMPARISON Evaluate Products	4. DECISION Choose the Best	5. PURCHASE Buy Product	6. POST-PURCHASE Review & Revisit
STEPS What does the customer do?	Realizes she needs a skincare or cosmetic product for her skin concern.	Searches online and explores different brands, categories and products.	Compares products based on brand, price, category, ingredients, ratings and skin type.	Selects the most suitable product based on insights from dashboard.	Buys the product from an e-commerce website or offline store.	Uses the product, shares review and may explore more products again.
INTERACTIONS What interactions does she have?	- Social media posts - Beauty influencers - Friends - Online ads	- Visits websites - Reads blogs - Watches videos - Searches products	- Uses filters in Tableau dashboard - Applies skin type filter - Compares brands - Checks ratings	- Reviews dashboard insights - Checks price trends - Validates product suitability	- Adds to cart - Applies offers - Makes payment - Receives order confirmation	- Writes review - Shares with friends - Visits dashboard again for new products
TOUCHPOINTS Things, Places, People	Instagram, YouTube, Beauty Blogs, Advertisements	Cosmetic Websites, Tableau Dashboard, Search Engines, Brand Websites	Tableau Dashboard (Interactive Filters, Charts, KPI Cards, Story)	Tableau Insights, Product Details Pages, Reviews, Ratings	E-commerce Website/ App, Payment Gateway, Customer Support	Email, Dashboard (Recommendations), Product Review Section
GOALS & MOTIVATIONS (Help me...)	Help me understand what products are available for my skin concern.	Help me discover trusted brands and the best categories.	Help me compare products easily to find the best value for my money.	Help me choose the right product confidently.	Help me buy the product quickly and securely.	Help me track my experience and find better products next time.
EMOTIONS	🙄 Curious but unsure where to start	😊 Excited to explore many products and brands	😞 Confused by too many choices and information	😊 Confident after analyzing insights and comparisons	😊 Satisfied after successful purchase	😍 Happy if product meets expectations; else disappointed
PAIN POINTS	Too much information on social media, confusing choices.	Hard to find reliable information in one place.	Difficult to compare multiple brands side by side.	Unclear which product is truly suitable.	Unexpected shipping charges or long delivery time.	Sometimes products don't match expectations.
OPPORTUNITIES	Create awareness through social media and influencers.	Provide a centralized Tableau dashboard with all key insights.	Offer powerful filters and clear visual comparisons.	Provide data-driven recommendations and top picks.	Ensure smooth checkout and secure payment.	Provide review section, personalized recommendations and loyalty offers.

Journey Map

Stage	Discover	Explore	Compare	Decide	Reflect
Steps	Realizes need for a skincare	Opens Cosmetics Insights	Filters by skin type; reviews top 10	Picks a brand/product matching skin	Analyst reviews brand performance

Stage	Discover	Explore	Compare	Decide	Reflect
	product (e.g. moisturizer for sensitive skin)	Dashboard; browses category distribution	brands and average prices	type, price, and rating	vs. 115 competitors
Interactions	Searches generally for skincare advice	Category_Level Product Distribution, Category wise total revenue worksheets	Dry / Oily / Sensitive / Combination / normal worksheets; Brand with their average prices	Top 10 Brands suitable for all skin types; price vs rank scatter plot	Story 1 storyboard; Top 10 brands by product count
Goals & Motivations	Find the right product without wasting money	Understand what categories and price ranges exist	Narrow down to products matching skin type and budget	Buy with confidence based on data, not guesswork	Benchmark and identify market gaps
Positive Moments	-	Clear category breakdown (1,472 products across 6 categories)	Skin-type filters return relevant, suitable products instantly	Top-10 view makes the decision quick and confident	Storyboard gives a clean, presentable summary
Negative Moments (Before Solution)	Too many options, no starting point	Listings on e-commerce sites are unstructured	No native way to compare skin-type suitability across brands	Risk of choosing a poorly-rated or unsuitable product	No visual way to see competitor catalogue performance
Areas of Opportunity	Single entry point (dashboard) instead of scattered listings	Category and skin-type filters on the dashboard	Price vs. rank scatter plot to validate value for money	Top-10 brand views and skin-type suitability charts	Story 1 narrative for quick competitive benchmarking

Touchpoints Mapped to Dashboard Features

- Category filter -> Category_Level Product Distribution Analysis; category level product distribution
- Skin-type filter -> Dry, oily, Sensitive, normal, Combination worksheets; total skin types count
- Brand comparison -> Brand Count; Brand with their average prices; Top 10 brands by product count
- Price-to-quality check -> price vs rank scatter plot
- All-skin-type recommendations -> Top 10 Brands that are suitable for all skin types

- Competitive overview -> Story 1 (storyboard)

Key Insight

Each stage of the journey maps directly to a pain point identified in the Empathy Map (information overload, lack of comparison tools, uncertainty about price-to-quality). The dashboards were designed so a user moves from a broad overview (category/brand counts) to a focused decision (skin-type suitable, well-priced, well-rated products) in just a few clicks.
